

Vision and Values

Our **Vision** is based on **core Values** that guide our mission:

- Quality **Service** to our Clients
- Wealth of **Experience**
- **Knowledge** Base and **Professionalism**

Service to clients is our top priority and commitment. The essential ingredients for offering quality service are the wealth of **experience** we have gained on actual construction projects, and professional **knowledge** that we strive to constantly enhance with latest trends in the construction industry.

Quality Client Service

- Our client's and their interests always come first. We strive to develop expedient, cost-effective solutions that help clients achieve satisfaction and their goals.
- We strive for creativity and imagination in everything we offer, always striving for better ways to solve clients' problems.
- We understand that construction delays translate into added cost to client and contractor. We work as an extension of client's project team to complete projects within time and budget.
- We pride in timely documentation, processing and reporting.

Wealth of Experience

- The diversity of project types we specialize in enables us to offer our clients, as a single source, all the design and construction related services.
- Since we work extensively with contractors and on active construction projects, we have acquired knowledge and experience unmatched by traditional design consultants. This experience directly translates into making expedient and cost-effective decisions.
- Our extensive experience with the construction industry gives us the opportunity to melding creativity with latest technology to offer professional quality of work.

Knowledge and Professionalism

- We take great pride in the professional quality of our work, and have uncompromising determination to achieving excellence through constantly enhancing our knowledge base.

- We constantly strive to enhance our technical and management skills by keeping up with the latest trends in the construction industry, by continuously learning, participating in seminars, enhancing technical skills through acquiring and learning industry specific programs and reading technical journals.
 - Integrity and honesty are the hallmark of our service and we urge our staff to maintain high ethical standards.
 - We comply with rules and ethical principles that govern our practice.
 - We safeguard the confidentiality and trust of our clients.
 - We maintain professional membership in recognized industry organizations, such as ASCE, ASFE, ACI, AISC, AWC, PCI, PDSI, etc.
